

VIRTUAL SECURITY MANAGER

DATA SHEET

UNRESTRICTED

1. VIRTUAL SECURITY MANAGER

1.1 SERVICE DESCRIPTION

A Bulletproof Virtual Security Manager/Virtual CISO (vSM/vCISO) is a way for businesses to access industry-leading cyber security knowledge in a flexible, cost-effective way. By having a seasoned security expert on a monthly retainer, your organisation can benefit from their years of security experience for a fraction of the cost of a dedicated in-house employee.

As well as access to an experienced security management professional, the vSM/vCISO service also gives access to a wider virtual security team for hands-on help with specialist cyber security challenges. Unlike strategy-only vSM services, Bulletproof can provide technical implementation support for a variety of platforms and technologies.

1.2 KEY FEATURES

- **Cyber security leadership and governance**
Experienced cyber strategy, industry insight and big-picture thinking, whenever you need it.
- **Compliance management**
Manage the burden that various compliance frameworks place on your cyber security.
- **Risk lifecycle management**
Complete ownership and management of your cyber security risks and threat landscape.
- **Development of security processes and procedures**
Good security needs a strong foundation in policy, tailored to meet your organisation's needs.
- **Incident response planning and implementation**
Help preparing for, dealing with and recovering from a variety of cyber incidents.
- **Operational and project-based guidance**
Help with business-as-usual security tasks and specialist project-based engagements.
- **Specific technical implementations and challenges**
Technical expertise, whatever the challenge – from vendor selection to system and network configuration.
- **Audit support**
Planning and support through internal and external audits.
- **Training and awareness**
Help support your staff's security mindset with up-to-date security awareness and specific training.

1.3 BUILD THE PERFECT PACKAGE

A vSM/vCISO service can only be effective when it works in harmony with the unique needs of your business, which is why the Bulletproof Virtual Security Manager package is tailored to your specific requirements. This means you get the cyber security assistance you need, exactly when and where you need it.

1.4 IN-HOUSE SECURITY OPERATIONS CENTRE

A key feature of Bulletproof is our in-house Security Operations Centre (SOC). Based entirely in the UK, it's the command centre of our cyber security operations and is staffed 24/7 by trained, experienced security professionals.

Our staff are:

- CREST approved
- Certified Information Systems Security Professional (CISSP)
- Certified Information Security Manager (CISM)
- Offensive Security Certified Professional (OSCP)
- Tigerscheme Qualified Security Test Member (QSTM)
- Certified Ethical Hacker (CEH)
- ISO 27001 Implementer
- CCNA and CCNP Security
- Certified EU GDPR Practitioner
